

VIZNIJ ROMAN

FRONTEND DEVELOPER

I was born in a small town called Rakhiv in 1996, which is surrounded by mountains. I am responsible and creative person who's always trying to learn something new. I have some experience in a various fields. Mostly I fell comfortable working at the computer

EDUCATION

FERENC RAKOCZY II.
TRANSCARPATHIAN HUNGARIAN
COLLEGE OF HIGHER EDUCATION

Major: Math and Computer Science
Sep 2013 - May 2017

LANGUAGES

ENGLISH - B2
HUNGARIAN - C1
UKRAINIAN - FLUENT

CONTACT

+380976889429

ron.viz.dev@gmail.com

EXPERIENCE

MARKUP DEVELOPER

FREELANCE | Oct 2021 - Sep 2022

FRONTEND DEVELOPER

IQua | Dec 2022 - Sep 2026

SKILLS

Programming Languages

JavaScript (JS), TypeScript (TS)

Frontend

Angular, React, RxJS, NgRx,
HTML5, CSS3, Flexbox,
Bootstrap, Tailwind CSS,
PrimeNG, jQuery

CSS Preprocessors

SASS / SCSS, LESS, Stylus

Testing

Unit, Component & E2E testing;
Karma, Mocha, Chai, Sinon,
Jasmine, Cypress, Playwright

Backend & APIs

Node.js, NestJS, Express.js,
REST API, WebSocket,
TypeORM

Build Tools & Development

Docker, Webpack, Gulp,
Nx, Git

AI

Claude & Cursor
(agents, skills, MCP)

Databases & Services

SQL, PostgreSQL, MySQL,
Firebase

CMS

WordPress, Joomla

Mobile Development

Ionic, Capacitor

Design & Multimedia

Figma, Photoshop

PROJECTS

Fat Finger

Migrated a large legacy application from AngularJS to modern Angular, refactoring existing components and adapting the codebase to the new architecture. Developed and maintained new features, improved existing functionality, and contributed to the ongoing modernization of the platform.

Symphony (Taxonomy)

Core front-end developer on a large enterprise ad-tech application for campaign taxonomy management and automated name generation. Built and evolved the spreadsheet-based generator — hierarchy rules (parent / child / sub-child / standalone), formula parsing and validation, copy-paste, fill-in-range, bulk import/export — and delivered integrations with CM360, DV360 and Prisma (RFP export). Optimized rendering and data-processing performance for spreadsheets with tens of thousands of rows, led successive Angular upgrades (v10 → v12 → v14 → v21) together with the shared internal UI library, and refactored and stabilized the unit, component and integration test suites (Karma/Mocha, Cypress).

Symphony (Campaign Builder)

Developed features for a workbook-driven media campaign setup application covering search, social, DSP/programmatic, direct buys and ad trafficking. Implemented and stabilized ad-server and ad-trafficking flows (CM360 campaign/placement matching, publishing, market briefs, autosave), eliminated duplicated API calls and reworked request lifecycles to improve responsiveness, and refactored the main workbook component to configuration-driven logic. Integrated the taxonomy application as a git submodule to provide in-place name generation.

Symphony (Master Data Management)

Contributed to a Master Data Management application from an early stage as one of its main developers. Implemented schema-driven dictionaries and cross-system value mappings — dynamically generated grids, columns and filters built from backend schemas, list and mapping views, "Map Values" modes, export, server-side pagination, search and filtering. Improved data-grid UX and performance for large lists, enforced validation and normalization rules, and continuously refactored large components into smaller maintainable pieces, backed by unit tests and Playwright integration/e2e suites.

Fittra PM

Firebase project management platform for a construction company (projects, estimates, finance, HR, maintenance, client portal). Implemented third-party integrations, activity logs, permissions and API tokens across front end, Firestore rules and Cloud Functions; extended the AI layer with MCP servers exposing business data to LLM agents; covered features with Jest and Playwright (Firebase emulator).

FactMe

Designed and developed a cross-platform mobile application for discovering curated facts across multiple topics. Built the Angular/Ionic/Capacitor architecture, multilingual content system, topic-based fact browsing, favorites and history, daily quizzes with streaks and progression, IQ tests, themes, and scheduled local notifications. Integrated Firebase services, optimized local data loading and state management, and implemented Android-specific notification scheduling and customization.
